It is, therefore, indispensable that his character for industry and integrity should be unimpeachable; and to the office of record goes the city merchant for information concerning the country gentleman who asks credit.

Here he is told that Peter Smith, of Yuba Dam, New Hampshire, is thirty-five years of a c, married, and has two children; has been engaged in the trade seven years, and is believed to be honest, has a working capital o \$5000, owns a homestead worth \$1200, and has "great expectations" that his wite's U.cle Billy, who is old and paralytic, will soon visit his ancestors, leaving to Peter's wife the nice little sum of \$10,000 in United States bonds. Smith's credit is, therefore, pronounced to be "good," and Mr. Merchant lets bim have a thousand dollars' worth of calico, tape and spool cotton, to be paid for at the end of six or nine months. Or, it may be that Mr. Smith is not known to have any money, except that which his wife holds in her own name; that he is extravagant and immoral, and so, of course, may not be recommended as a luyer on time. Smith is therefore politely bowed on time. Smith is therefore pointer bower out of the warehouse, to seek credit where the secrets of the "record" are not known.

But in what way is information concerning

traders in distant places obtained, and how do we know that the office of Record or Mercantile Agency contains a true and trustworthy register of the characters and property of our country cousins? There are two ways of compiling the register—a thorough one, such as the adopted by Broadway & L. and Done Miller, of Georgia.

The conference report on the Navy bill was concurred in. It claims to save \$1,000,000, and reduces the personnel of the navy to its standing before the war. The following is the resolution proposed by the Judiciary Committee in regard to the President's amnesty:

The worth of bonds have been issued to the Pacific Committee of Ways and Means of the House, it is reported, have had it for some two weeks in course of preparation, and, it is said, are about ready to report. Some few of the members of the House believe that body will be able to adjourn on the swenty-seventh.

It is difficult to say which will attract the most attention and the largest crowd of visitors.

The bill to enable the banks of the State to renew business, or to place them in liquidation, was taken up to-day in the Senate. and amended, on motion of Rainey, chairman of the Finance Committee, by striking out the provision requiring banks renewing business to pay to the State one per centrm per annum. It was also amended by the addition of the following proviso, offered by Senator Corbin "That all banks rechartered and recommend ing business under this act shall be subject to taxation." In case of the failure of any bank to comply with the terms of the act, the Circuit Judge in which such bank is situated, is to appoint a receiver to take charge of the assets of said bank, &c. The bill as amended was then ordered to be engrossed.

Mr. Allen, from the Committee on Roads, Bridges and Ferries, to whom was referred a bill to establish a public Ferry in York County, reported back the same, with a recommendation that the bill do pass with the following proviso: "That children going to or returning from school, and voters going to or returning from the polls on days of election, shall be passed free of charge on such ferry." COLUMBIA, February 16 .- THE SENATE WAS crowded this evening by spectators to hear the debate on the veto message. The Speaker and a large number of members of the House of Representatives, as well as a large number of other visitors, were present.

Sanator Corbin read the report of the Committee on the Judiciary, showing that by the secords of the Senate the act to re-enact certain acts lending the name and credit of the State to the Greenville and Columbia Railroad was presented to the Governor at ten minutes past two P. M. Saturd vy, February 6, 18.9. and was raturned on the Wednesday following between twelve and one P. M.

The committee express the opinion that the "three days," as used in the 221 section of article 8 of the Constitution of the State, must be

construed to mean three full days, of twenty-four hours each. If this rule be adopted, the act in question did not become a law by reason of its non-return to the Senate, as the three of its innertant to was senate, as the three days' time did not expure until Wednesday, February 10, 1869. at 2.10 P. On this a lively and interesting debate fol-

Senators Corbin, Donaldson and Rainey made able and carnest appeals in support of the veto, dwelling myro particularly on the beneficial influences is would have upon the finances of the State abroad.

Senator Leslie replied to Senator Corbin, and made one of his happiest efforts, full of fun, original wit and solid assument, in support of the bill and against the veto. His speech commanded the closest attention, and seemed to have exercised considerable influence among the members, as the vote by which the act was passed was totally unexpected.

Senator Cain also made a forcible speech in support of the bill, taking broad and liberal ground for the encouragement of all railroad enterprises. He was not willing to let this road be sold for a sond, and for the purpose of allowing it to go into the hands of a few speculators.

"Tail oaks from little acorns grow, Large streams from little fountains flow." TION BIFFERS were but little known. To-day there is not a nook or corner of our land where they are not found and used. The sal has reached the enormous nember of Five Millions of Bottles annually, and it is constantly increasing. It only shows what can be done with a really good medicine, and a systematic course of making it known. Perhaps no medicine in the world was ever so deservedly popular as the PLANTATION BITTERS. Go where you will, among the rich or poor, and you will always find these Bit ters in use. Their merit has become an established fact, and we cordially recommend them in cases of dyspepsia, loss of appetite, chills and fever, headsche, &c., &c.

> WHY IS IT THAT THE FEEBLE totter, with uncertain steps, over the face of the earth, in danger every day of falling victims to the morbid influences by which we are all surrounded, when a tested and proven v. getable tonic, capable of endowing them with the vigor they need, is procurable in every city, town and settlement? It might reasonably be thought that after the twelve years experience which the world has had of HOSTET-TER'S BITTERS, all would know that its effect is to prevent disease.

> At this season the atmosphere is surcharged with the seeds of intermittents, remittents, rheumatism pulmonary disorders, bilious complaints, and the like. Persons whose nervous systems are relaxed, are the first to succumb to these distempers. Brace up the physical energies then with this potentia vegetable tonic. It is the most powerful recuperant nich the botauic kingdom has ever yie ded to pa tient research and experiment. Try it. The blindest disciple of the old medical dogmas will at least admit that a tonic and alterative, compounded of ap proved herbs, roots and barks, can do no harm, while the testimony of thousands invites a trial of Vigor is the thing most needed in these cases. a

well as in dyspepsis and nervous affections, afid HOSIEITER'S BITTERS is the safest, surest and most wholesome strengthening proparation that human skill has yet concocted. As a tonic, it is both mild and agreeable to the taste, and stimulating in ts action upon the system. Hundreds of physicians have abandoned all the officinal receipts, and prescribed this harmless tonic
